

## 2024 Nominee for Nominations Committee Member

### **Michail Lionakis, M.D., Sc.D.**

Deputy Chief, Laboratory of Clinical Immunology and Microbiology

Chief, Fungal Pathogenesis Section

Acting Chief, Laboratory of Host Immunity and Microbiome

Acting Chief, Metaorganism Immunity Section

National Institute of Allergy and Infectious Diseases

National Institutes of Health, Bethesda, MD, United States

---

**The nomination committee's responsibility is to assemble the best slate of candidates for Council and Nominations Committee vacancies. This includes verifying prior participation in ICIS activities and assessing how well each candidate aligns with the organization's mission and objectives. Please describe reasons why you feel you are well qualified to serve as a member of the Nominations Committee, including how your background and network has given you a diverse perspective.**

As a physician-scientist studying the role of cytokines, chemokines, and interferons in fungal immunity and autoimmunity, from defining precise disease mechanisms to devising targeted immunotherapies in patients, my research background aligns with the ICIS mission and objectives. As a member of the ACP award committee and of the mentoring committees of several NIH tenure-track -including several female and underrepresented minority- investigators, I have gained valuable experience in this space.

**Please list your current and/or past participation in ICIS committees. Include committee membership, positions of leadership, speaking invitations, etc.**

Invited speaker, CYTOKINES 2023, Athens, Greece, 2023

**List any other relevant qualifications for office, including any non-ICIS volunteer or other leadership activities. (Not a CV.)**
